**Science (Fact or Fiction / Truth or Lie)** – (Ken Walston - Kenna Outreach Ministries)

From Ken, who by Faith has been called by the Great God and Saviour, Yeshua Adonai, to be a Believer and Teacher for the edification of the Believers of the Way, the Church or Body of Yeshua. May God the Father (YAHAWAH), who has given us the Holy Spirit (Ruach HaKodesh), open your eyes and your heart to the Truth and bring you Peace (Shalom) according to your Faith.

This again is what the Lord has purposed me to tell you and write down so that you may be made aware in order to strengthen your Faith in the One True God, Yeshua Adonai…Amen.

Adonai wants you to be knowledgeable and that your knowledge be based in the Truth regarding what He has Created, and the substantiation of what man believes to be the truth through the evidence and physical reckoning of science. The situation for people that don't believe in God or are totally indulged into the calculating evidence of science, is that they refuse to understand and overlook the reality that God created Everything they use as physical evidence to prove and or disprove the existence of God. This of course is opposed to the Holy Essence of Elohim who is Spirit and unseen because He Exists at a much higher dimensional order out of sight to the physical creation, where out of Him everything that is physical (seen) and Spirit (unseen) came from.

This is why Elohim took on physical form, in order to commune and convey with His physical creation (seen), just as He does within His Abode (Spirit-unseen). He chose to do this with the only physical beings that He had Created in His Image (embodied His Spirit), which is mankind (Human Beings), we are the Highest Order within all of His Creation.

Science is man's derivative (Macro or Microscopic) which can base the substance of inquiry and supposition related to the physical universe. Science attempts to accomplish this through Theorems, Analytical and Arithmetic Modeling, Datum, Laboratory Research and Experimental Testing, and Quorum Debate to the Supposition of Principles, which will eventually provide factual evidence for or against a standardized Thesis or quantify a Universal Law.

Science gives mankind knowledge of the obvious assumptions to his physical and seeable dimensions and manipulates the substance of physical matter. It becomes the basis to identify all truth relative to the Laws of Physics and the entire Human Experience.

Science through the best of Man's ability, can only substantiate what is part of this physical universe and the activities associated to it, which is temporal; but it cannot substantiate that which is unseen (Spirit), which is the actual Life Force and proponent of producing all which is physical (seen), which is Eternal.

It is indeed awestruck that out of all the approximately 8.3 million species on this planet (Approx. 2 million being animal types), that only Homo Sapiens (Human Beings) have the position among them as the Highest Order of Creation. We rule the planet completely. Among the variable of species, humans are the only endothermic vertebrate mammal to walk upright which possess a brain that has two Cerebral Hemispheres that is bridged by a 6-layered neocortex, which has allowed us to think collectively and build language and exchange communication between God

and man. We are the only species on earth or in the entire universe that God calls “His Children” and we call Him “Our Father”.

Science relies completely on the collection of physical evidence and the extrapolation of Data in order to concede that discovery has been vindicated by conclusive findings which can be validated by the Data. Therefore, if the Data is wrong, then the evidence is tainted, and the discovery not vindicated to a reliable conclusion. So, because both of these scenarios can exist in the Scientific Method, one called “Good Science” and the other called “Bad Science”, where does Truth Prevail?

Well, the vindication of the discovery is based on the findings being agreed upon. So, in this manner, any findings can either be Truth or False, nevertheless, they will be incorporated as the “Truth” if agreed upon. The manipulation of Data is an important factor in showing the discovery has validated conclusion.

From the Human Theology, Science has no God, Science is and becomes the intellect of what is God! The Human Intellect is only a small portion of what God has allowed man to evolve in. Humankind’s evolution is not a physical transformation, but rather a Spiritual Rebirth Transformation. We are Spirit Beings having a Human Experience, and it is temporal.

This physical Human Experience is also relative to the Physical Universe, they are interlocked and tied together, as if one in the same. Man’s physical presence in the physical universe is no coincidence; and it is not just a coincidence that only mankind can explore and make discoveries about the universe and invent the science and mathematics that guide that discovery.

The logical assumption that with all of the billions of galaxies and within them are billions of stars and possible millions of planets circling those stars, is that Life as we know it must be throughout the universe, and we are not the only source of intelligent beings. The assumption is based highly around the Theory of Probability and Evolution, that throughout the universe where there is earth like planets that could possibly have liquid water, microbes living in that water could evolve into higher organisms and then into primal species and finally primates and them into higher level intelligence (human-like). Nevertheless, this theory has no empirical evidence to any fact. It is a purely speculative assumption based on a dream and misinterpretation of fossil findings from an individual who later in his life ended up disclaiming it. It was a great attempt to disclaim the Genesis story of Creation by using a so-called scientific model based on physical evidence from a long study of displaced fossil remains from species on one particular island here on earth.

God created Mankind as an extension of Himself (Elohim) in order to give witness to His Majesty and participate in His Creation and He let it come through man in order to establish the Life Presence in the entire universe. We and the earth itself are unique within the entire universe. God Himself made that declaration by saying that, Heaven was His Abode, and the Earth was His Footstool (Isaiah 66:1). This states unequivocally, that from His Presence in Heaven, He created the Earth to be the only point where He communes with Life (His Footstool) and Mankind (Humans) are the only point of that Life Communication equal to God Himself. There is no other!

The vastness of the physical universe is a mystery and the purpose of it is to demonstrate the awesomeness of God’s personality with His Creation. It is a reminder to us all every time we look up into the sky that we are beholding His Majesty and Handiwork. That within the dimensional characteristic of our sight we can see His Presence. That from the unseen dimension of His Abode, He projects Himself in manner of Power, Authority and Presence.

When man acquired the Knowledge of Good and Evil, he did so in a manner that separated him from God. In the Realm of God’s Perspective, which far exceeds man’s limited physical and mental perspective, it’s all His to begin with. He is the Creator and everything that stands before him in both Spirit’s and Flesh have come out of His Eternal Being.

Even in the understanding of how the physical universe came about, man can only search for answers through his science, and the beginning of that understanding needs a starting point. There has to be some physical beginning, a pinpoint of matter which exploded into everything we can see in the physical creation. It is totally inconceivable for science to equate, that from Nothingness came the entire content of the physical universe.

The acceptable theory and axiom is that there was a beginning pinpoint of condensed substance and energy the size of a pinpoint which spanned a region of only $1x10^{-33}$ centimeters, and that in an undetermined instant, it exploded outward to 360 degrees with such extreme force and velocity that within $t=1x10^{-43}$ seconds 90% of all the known mass of the universe was expelled. As if it was a little hole coming forth through a tremendous veil, bursting forth the unmeasurable force of substance and heat (in the Trillions of degrees) that what was behind it. That within 380,000 years after the initial Explosive Event, or "Big Bang", the universe had cooled enough for atoms to begin forming and quantum physics was being birth.

That behind the veil of Nothingness, where the Abode of God is, was the Eternal Substance of having No Beginning and No End. Spirit without form, Pure Energy, not cosmic but something unspeakable and beyond imaginary. Something Theologians call "Supernatural". There is no science that can explain something that you cannot physically pick apart and scrutinize. What we are witnessing is the aftermath and result of the Power that produced the Event. So, science calls it fiction, not substantiated by the known Laws of Physics or Quantum Theory. It becomes the proponent of Nay-Sayers who will use any leverage to make it seem like a fallacy rather than reality.

When you can't label something, then you mislabel it, you put it into the realm of something that only a little child with a vague understanding of reality and experience would accept…a Fairytale.

The expressed mantra and testimony of the atheist that there is no physical evidence of God's existence is absolutely false. Everything around us gives testimony of His Majesty and Existence. Where there is Absolution in the midst of a fallen world, Perfection out of Imperfection, Faith, Hope and Love prevails when Doubt abides, the burden of sin takes on the yoke of forgiveness, that through Faith denial becomes the confession of the Truth and the prevailing Science of God.

God is more real than that loaf of bread you are holding in your hand, or that brick wall you just ran into. That which is unseen is greater than that which is seen, because all things were made from that which is unseen.

Science is the exemplary attempt of man to measurably express and justify the reality of his physical existence and all facts related to that existence from beginning to end. It expressly denies anything labeled as Supernatural or Faith Based as unprovable through Scientific Methods or the Laws of Quantum Physics. But science is showing that the beginning of the physical universe came about from the opposite of what the physical universe can substantiate. There is no way to reproduce the force and mechanics that created all things as we know it through the science we have before us.

Something was behind the Vail of Nothingness that spewed forth all that we see before us. Could that something be GOD? The answer to that question is, "Most Assuredly!"
